

## SUPPLY CHAIN DIAGNOSTIC

*Are you unsure on where to start? Need another set of eyes?  
... Let us provide experienced professionals and help you achieve quick wins!*

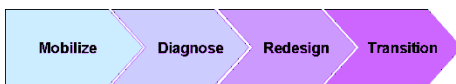

When you don't know where to start, our industry experts evaluate and streamline your logistical network and supply chain processes through a structured diagnostic process based on the Supply Chain Council's SCOR model. Our experienced cross-functional teams will identify, assess, and prioritize savings opportunities in your logistical network.

### SCHNEIDER'S CORE COMPETENCIES

- Diagnose such areas as the flow of product through you logistical network, order mgt, and carrier & transportation management processes.
- Map out and simulate network and processes

- Utilize various frameworks based on CSCMP's SCOR Process Standards, Dr. Hammer's Process Design & Reengineering, or 6 sigma's DMAIC

	Process Assessment					Estimated Revenue / Savings Impact	Estimated Customer Service Impact
	1	2	3	4	5		
<b>4.0 Deliver</b>	Below Minimum		Minimum Standard		Typical Best Practice		
<b>4.1 Order Management</b>						USD	L - M - H
4.1.1 Order Receipt and Entry						1,000,000	High
4.1.2 Order Validation						200,000	High
4.1.3 Order Confirmation						350,000	High
4.1.4 Order Processing						1,200,000	High
<b>4.5 Transport</b>						USD	L - M - H
4.5.1 Dedicated Carrier						40,000,000	High
4.5.2 Common Carrier (pay per)						140,000,000	Med
4.5.2.SLI.1 Less than Truckload						80,000,000	Med
4.5.2.SLI.2 Truckload-Dry Van						90,000,000	Med
4.5.2.SLI.3 Expedite						1,000,000	High
4.5.3 Small Parcel Transport Management						12,000,000	High
4.5.4 Proof-of-delivery/In-transit Visibility						5,000,000	High
4.5.5 Freight Payment/Audit						180,000,000	Low
4.5.6 Transportation Management System						6,000,000	Med
4.5.SLI.7 Carrier Management & Performance							High

Note: Process Sections and subcategories are from the Supply Chain Management Process Standards of the Supply-Chain Council's Supply-Chain Operations-reference model (SCOR) with modifications by Schneider Logistics, Inc.

- Leverage Schneider Logistics' experience with thousands of industry's best practices
- Develop an improvement action plan

### SCHNEIDER'S INDUSTRY LEADERSHIP

- Expertise in logistics, engineering, transportation, network optimization, and process analysis
- Diverse sector experiences from automotive to consumer packaged goods to heavy mfg to retail
- 3PL experience in designing AND implementing solutions
- 6 sigma experience

### BENEFIT

Network and process diagnostic allows you to:

- Identify and prioritize network improvements that save your company money
- Embed a logistic expert on your company's transformation team
- Involve regional and subject matter experts
- Develop local "sense of ownership" with channels, divisions and/or countries
- Receive an external & unbiased review of network
- Develop business case for supply chain initiatives
- Assess less-developed supply chains around the world due to mergers & acquisitions

### KEY FACTS:

- Over 50 industry experts with operational experience in transportation and carrier management, warehousing, and logistical planning
