## The Big Orange Recognized for Going Green as 40<sup>th</sup> Anniversary of Earth Day Observed

*Schneider National's Truckload and Intermodal divisions recognized  
for energy efficiency, emission reductions*

**Green Bay, Wis.** - April 22, 2010 - Schneider National, a premier provider of transportation, logistics and intermodal services and a company well known for its orange-colored fleet, has been going green for more than 30 years. As the 40<sup>th</sup> anniversary of Earth Day is observed, the company is being recognized with back-to-back awards for its longstanding commitment to improving energy efficiency and reducing the greenhouse gas emissions of its fleet.

In a ceremony held at the company's headquarters today, Fleet Owner magazine, an industry trade publication for transportation managers of the nation's commercial-trucking fleets, named the Green Bay, Wis.-based company its **2010 Green Fleet of the Year**.

"It demands a lot of commitment and effort to take the lead in an industry as hard working and dedicated to excellence as trucking," noted Wendy Leavitt, director of Editorial and Market Development for Fleet Owner, who presented the award to Schneider. "It was a unanimous decision to name Schneider as our Green Fleet of the Year."

Leavitt noted Schneider's long-term commitment to sustainability, dedication to ongoing driver training, aggressive new-technology testing program, participation in organizations and programs to further sustainability, diligence in measuring results with a willingness to share metrics industry-wide in the spirit of thought leadership and optimization of equipment, policies and practices for maximum energy efficiency and minimal impact.

CSX, a leading transportation company providing rail, intermodal and rail-to-truck transload services, recognized Schneider for its commitment to greening the supply chain with its **2009 Environmental Award**. The award, presented on the eve of Earth Day, was in recognition of Schneider's efforts to ship freight via intermodal, thereby reducing carbon emissions, decreasing congestion on the highways and conserving fossil fuels.

"CSX is pleased to be a part of Schneider's green supply chain and recognize its commitment to sustainability," said Clarence W. Gooden, executive vice president, sales and marketing and chief commercial officer for CSX. "This award recognizes our customers who led their industry in CO<sub>2</sub> emission avoidance in 2009, demonstrated the greatest improvement in avoided emissions in 2009 vs. 2008, and deserved special recognition for their commitment to sustained supply chain practices through the use of rail or intermodal."

Schneider has been conducting business in an environmentally responsible manner and working aggressively to reduce its carbon footprint for decades. Improving fuel efficiency, reducing greenhouse gas emissions and upgrading the energy efficiency of its facilities are all a focus of the company's sustainability strategy.

"We are proud of our leadership position and applaud those shippers and suppliers who are equally committed to a sustainable future, including being SmartWay Transport Partnership members," noted Steve Matheys, executive vice president, chief administration officer, Schneider National. (The EPA SmartWay Transport Partnership program is an innovative, market-based partnership to reduce fuel use, greenhouse gas emissions and air pollutants from the freight sector).

"For those customers and colleagues who have yet to become SmartWay members, there's no better day to take action than Earth Day. Join us and, together, we can deliver a cleaner tomorrow," Matheys added. For more information, visit [www.epa.gov/smartway/transport](http://www.epa.gov/smartway/transport).

Schneider National, a SmartWay™ Transportation Partner charter member, is a four-time winner of the U.S. Environmental Protection Agency's SmartWay Award of Excellence.
